## DriveLock

## How to Hide the DriveLock System Tray Icon

In some scenarios it is important to keep the visual aspects of DriveLock as little as possible.

One of these is to disable the System Tray Icon all together.

## **Proceedure:**

- 1. Open your DriveLock Management Console
- 2. Edit your Configuration File
- 3. Navigate to:
  - 1. Global configuration
  - 2. User Interface Settings
  - 3. Taskbar notification area settings
- 4. Change the user notification type to "None"
- 5. UnCheck the "Display notification area icon

Properties	?	×
General Options		
User notification type		-
O Display balloon messages		
O Display popup window		
None		
Display notification area icon		
Display icon only when a message is displayed		
Play sound when a message is displayed		
Display messages for	30 sec.
